PROJECT DEVELOPMENT PHASE

Dashboard Design

Date	5 October 2026
Team ID	
Project Name	Global Fuel Prices and Taxation Trends: A Comprehensive Analysis
Maximum Marks	5 Marks

Dashboard purpose

The dashboard consolidates the project's main fuel-price comparisons and trends so users can explore petrol, diesel and LPG prices alongside tax percentage, subsidy level, region, income level and Brent crude oil prices. It is designed for descriptive analysis and comparison; visual patterns alone do not establish causation.

Dashboard layout and visual components

Worksheet / component	Visualization type	Purpose in dashboard
Average Petrol Price by Country	Bar chart	Compare country-level petrol prices and identify higher/lower values.
Global Fuel Price Trends	Line chart	Review how fuel prices change over the 2020–2026 date range.
Fuel Type Comparison	Comparative chart	Compare petrol, diesel and LPG prices.
Tax Percentage by Country	Bar chart	Compare reported tax percentages by country.
Subsidy Analysis / Price by Income Level	Comparative charts	Explore differences by subsidy level and income group.
Brent Crude Oil Trend	Line chart	Compare crude-oil movements with observed fuel-price trends.

Design and usability decisions

• Use a clear title and consistent labels; identify fuel prices in USD per litre where applicable.
• Keep legends readable and use consistent colours for petrol, diesel and LPG.
• Provide country, date, fuel type, region, income-level or subsidy filters only where those fields are available in the published dashboard.
• Keep comparisons readable and avoid implying that tax, subsidy or Brent crude movements directly cause price changes.

Published Tableau dashboard

Open the live dashboard using the link below. This URL is also embedded as a clickable hyperlink in this PDF:

Dashboard validation checklist

Check	Expected result
Dashboard opens	Published Tableau view loads without an error.
Visual titles and units	Charts have readable titles, legends and applicable units.
Comparisons	Country and fuel comparisons are understandable.
Filters	Available filters update the relevant views as expected.
Consistency	Dashboard findings agree with the underlying worksheets.

Note: This document describes the dashboard components from the project workbook. Add an actual screenshot of the published dashboard if your evaluator specifically requires screenshot evidence.
