Project Design Phase-II
Data Flow Diagram & User Stories

Date	31 January 2026
Team ID	
Project Name	Global Fuel Prices and Taxation Trends: A Comprehensive Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

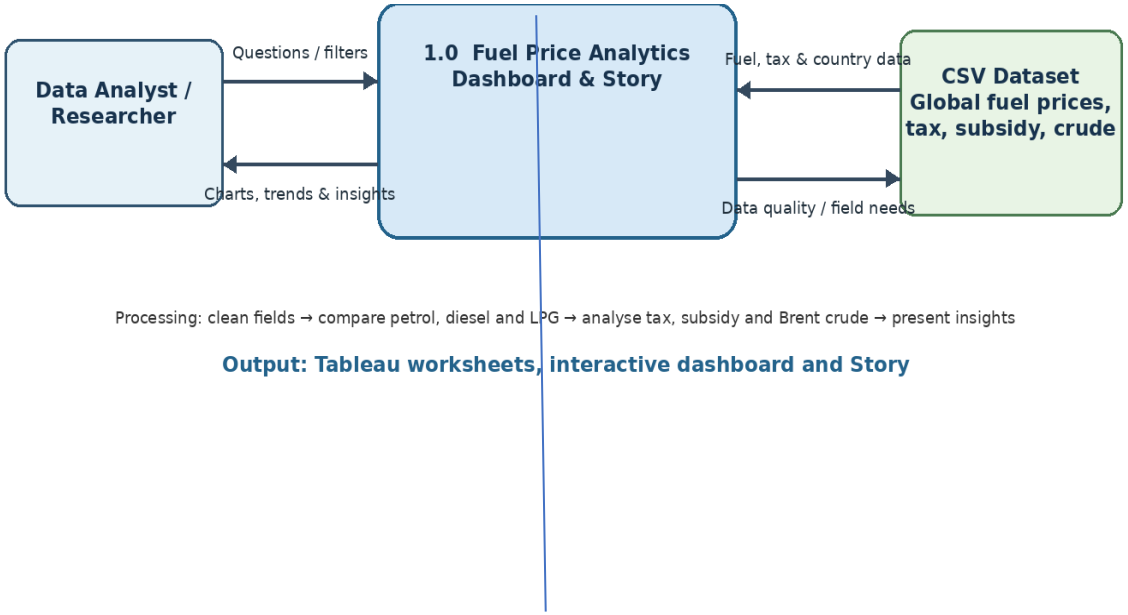

This data flow diagram represents how the global fuel-price dataset is used in the project. The CSV file supplies country, date, region, income level, subsidy level, petrol, diesel and LPG prices, Brent crude oil price, and tax percentage. These fields are checked and analysed to create Tableau worksheets, an interactive dashboard, and a Story for comparing prices and identifying trends. The diagram is a logical view of the analysis workflow; it does not imply that a separate database or live application backend was built.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	**External Entity**	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	**Process**	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	**Data Store**	A place where data is held for later use (e.g., Customer Database, Inventory).

Labeled arrow	**Data Flow**	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Data Analyst / Researcher	Data exploration	USN-1	As an analyst, I want to explore fuel-price records by country and date so that I can understand the dataset.	Country, date, fuel prices and related fields can be reviewed in the Tableau workbook.	High	Sprint-1
Data Analyst / Researcher	Fuel comparison	USN-2	As an analyst, I want to compare petrol, diesel and LPG prices across countries so that I can identify differences.	Visuals show comparable fuel prices by country using the available dataset.	High	Sprint-1
Data Analyst / Researcher	Trend analysis	USN-3	As an analyst, I want to view fuel prices over time so that I can identify changes and trends.	Trend charts use the date field and display the selected fuel-price measure.	High	Sprint-1
Data Analyst / Researcher	Crude oil relationship	USN-4	As an analyst, I want to compare fuel prices with Brent crude oil prices so that I can inspect related movements.	A chart displays fuel-price trends alongside Brent crude oil values over time.	High	Sprint-2
Data Analyst / Researcher	Tax and subsidy analysis	USN-5	As an analyst, I want to examine tax percentages and subsidy levels so that I can compare policy-related differences.	Country-level visuals allow tax percentage and subsidy level to be compared with fuel prices.	High	Sprint-2
Data Analyst / Researcher	Segment analysis	USN-6	As an analyst, I want to filter or compare results by region and income level so that I can explore group differences.	Available region and income-level fields are represented in the relevant visualisations.	Medium	Sprint-2
Dashboard Viewer	Interactive dashboard	USN-7	As a viewer, I want a consolidated Tableau dashboard so that I can review the main findings in one place.	Dashboard presents the project's key charts with clear titles, labels and legends.	High	Sprint-3
Dashboard Viewer	Story presentation	USN-8	As a viewer, I want a Tableau Story that explains the analysis so that I can follow the findings in sequence.	Story points present the analysis in a logical order and highlight key insights.	High	Sprint-3

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Project Reviewer	Interpretation	USN-9	As a reviewer, I want clear visual labels and units so that I can interpret comparisons accurately.	Charts identify measures and units; prices are labelled in USD per litre where applicable.	Medium	Sprint-3
Project Reviewer	Data limitations	USN-10	As a reviewer, I want the analysis scope and dataset limitations documented so that I can interpret results responsibly.	Documentation describes the dataset fields, date range and that results are descriptive rather than causal.	Medium	Sprint-3
