PROJECT DEVELOPMENT PHASE

Story Design

Date	5 October 2026
Team ID	
Project Name	Global Fuel Prices and Taxation Trends: A Comprehensive Analysis
Maximum Marks	5 Marks

Purpose of the Tableau Story

The Tableau Story presents the fuel-price analysis in a logical sequence, moving from overall trends to country comparisons and then to taxation, subsidies, income/region differences and Brent crude oil. It helps a viewer follow the analysis and understand the key questions without treating descriptive relationships as proof of causation.

Story sequence and observations

Story point	View / topic	What the viewer should learn
1. Overview	Global Fuel Price Trends	Introduce the 2020–2026 time span and overall fuel-price movement.
2. Country comparison	Average Petrol Price by Country	Compare reported average petrol prices across countries.
3. Fuel types	Fuel Type Comparison; diesel/LPG views	Compare petrol, diesel and LPG, noting that levels differ by fuel type and country.
4. Tax and subsidy	Tax Percentage by Country; Subsidy Analysis	Explore how reported tax percentage and subsidy categories differ across the dataset.
5. Group differences	Price by Income Level; region comparisons	Inspect differences between available income-level and regional groups.
6. Crude oil context	Brent Crude Oil Trend and fuel trend comparison	Compare crude oil and fuel-price trends visually without asserting causation.
7. Key takeaways	Summary of dashboard views	Summarize the most useful comparisons and state the limits of the dataset.

Observations to communicate

• The dataset enables country-level comparisons of petrol, diesel and LPG prices over time.
• Tax percentage and subsidy level provide policy-related dimensions for comparison.
• Brent crude oil provides a useful contextual trend to compare alongside fuel prices.
• Differences across countries, regions and income levels should be interpreted within the dataset’s coverage and definitions.
• Visual co-movement does not establish a causal relationship; the project is descriptive.

Published Tableau Story

Story review checklist

Check	Expected result
Story order	Story points follow a clear introduction, analysis and conclusion.
Text and titles	Each point has a clear title and explanatory context.
Visual consistency	Labels, units, colours and terminology are consistent.
Interpretation	Observations are supported by the charts and avoid causal claims.
Published link	The Tableau Story URL opens the published Story.

Evidence note: Add actual Tableau Story screenshots if your evaluator requires screenshot evidence.
